

# PLUM POLLINATION CHART

Varieties	Pollinators	Methley	Satsuma	Beauty	Shiro	Toka	Green Gage	Stanley	Italian	Seneca	Blue Damson	Golden Nectar	Flavor Supreme Pluot
<b>Methley</b>		0											
<b>Satsuma</b>		+		+	+	+							
<b>Beauty – Partially Self fertile</b>		+		0	+	+							
<b>Shiro</b>					0								
<b>Toka</b>						0							
<b>Green Gage</b>							0						
<b>Stanley</b>								0					
<b>Italian</b>									0				
<b>Seneca</b>							+	+	+		+	+	
<b>Blue Damson</b>											0		
<b>Golden Nectar</b>		+	+	+	+	+							+
<b>Flavor Supreme Pluot</b>		+	+	+	+							+	

0 = Self fertile

+ = Successful cross pollination

Most plums are self fruitful. Exceptions are Satsuma and Golden Nectar, which require a different variety of Japanese plum for pollination; and Seneca, which requires a different variety of European plum for pollination.
